Contents

[SECTION 1 – WHAT’S NEW IN GROUNDWORK MONITOR COMMUNITY EDITION 5.2.1](#)

[SECTION 2 – BEHAVIOR THAT HAS CHANGED IN VERSION 5.2.1](#)

SECTION 1 – WHAT’S NEW IN GROUNDWORK MONITOR COMMUNITY EDITION 5.2.1

New features in this version include:

Auto Discovery

- Numerous improvements to Auto Discovery automation including support for more than 9 match tasks which enable more complex custom automation descriptions to be created.
- Multiple SNMP community strings can be used in Auto Discovery. This increases the range of devices that can be discovered in a single discovery method.

SECTION 2 – BEHAVIOR THAT HAS CHANGED IN VERSION 5.2.1

- Auto-discovery modes ‘auto’ and ‘auto-commit’ are now functional.
- Erroneous references to MySQL Professional in the installation documentation have been removed.

See the readme document for a list of fixed bugs in this release.
